

Lake County Schools Food Services Professional Development day held on October 7, 2022 was an eventful day. Lake County School Nutrition Association (LCSNA) challenged each school to decorate a #10 can. Tickets sold were to raise funds for college scholarships with lucky winners drawn for an eye appealing can creation. WOW! Lake County Food Services has some very creative employees! What fun the staff had creating these as well as those winning them. This fundraiser was a tremendous success! LCSNA cannot wait until next year to see the exciting creations!

Each school had one vote to vote for their favorite decorated #10 can. Our very own Linda Milliken, Food Services Supervisor got the most votes for her fall decorated can. With the funds raised, LCSNA will be offering two college scholarships this year to two Lake County High School graduates.

During our in-service, LCSNA also took the opportunity and asked for donations of nonperishable food items to help the residents effected by Hurricane Ian. LCSNA sent all items collected to the Fort Meyers area for those impacted. We hope these donations provided some comfort and relief for those in need.

Peggy Adamic, LCSNA Nutrition Chair Member and Stacy Mathis, LCSNA President had the pleasure of working with two Lake County High School students while volunteering at this year's Annual Lady of the Lakes Renaissance Faire. Proceeds from the event helps raise money for the Lake County Education Foundation.

LCSNA is looking forward to a great year!
